

Introduction to Creative Kiln Work

This is a two-day course in fusing and slumping.

We supply the kiln, the glass cutting tools and materials (including the glass) for use during this course.

We look forward to welcoming you to our studio on the agreed dates to do this course. We take great care in personal attention to our students in teaching them the techniques that we've learned in this industry.

Fees

The fee for this course is R2 280 (incl Vat). This includes tuition, materials and firings in the kiln.

The Course Content

Project 1	Kiln Carving Beautiful platter made from window glass using fibre to carve shapes
Project 2	Using paints to decorate a glass piece. Paints used are fired into the glassware and become an integral part of the glass.
Project 3	Using glass shapes which are then enamelled and added to your basic shape to create a layered effect on the bowl or plate.
Project 4	BULLSEYE Dichroic Pendant

Number of Attendees

Classes are usually limited to four students per class due to the time taken for the kiln preparation and the firing schedules. Please contact us if you do wish to arrange for a bigger group.
